EDUCATION

University of Illinois at Urbana-Champaign | Champaign, IL — Anticipated Graduation: Dec 2022
- ➢ Bachelor of Science in Statistics and Computer Science with Business Minor

COURSEWORK

- ➢ Data Structures
- ➢ Algorithms and Models of Computation
- ➢ Programming for Data Science
- ➢ Artificial Intelligence
- ➢ Statistical Computing
- ➢ Database Systems
- ➢ Linear Algebra
- ➢ Game Development

WORK EXPERIENCE
Total: 40 months

Engineering Assistant – SPE Intern | Solar Turbines | San Diego, CA — Full Stack, UI/UX
May 2022 — Aug 2022 — JavaScript, HTML/CSS, SQL, C#

- ➢ Streamlined workflow for station operators and decreased set up time by 50% by engineering a custom organization tool
- ➢ Improved UI by integrating Bootstrap into front end and modernized UX to help with efficient controllability of machinery
- ➢ Facilitated accurate estimations by enhancing alarm data visualization through upgraded interface and charts using d3.js

Enterprise Technology Intern – RDC | State Farm | Champaign, IL — Data Analytics, Project Management, Full Stack
Aug 2019 — May 2022 — HTML/CSS, Java, JavaScript, Python, React.js, SQL

- ➢ Predicted work groups for ServiceNow ticketing with 82% accuracy by implementing classification models
- ➢ Set up a framework to estimate resolution time for ServiceNow tickets using regression models
- ➢ Designed an app to teach financial literacy as a part of a hand-picked task force in partnership with US bank
- ➢ Predicted lifespan of technologies used throughout the enterprise through creating and refining machine learning models
- ➢ Guided technology teams to help 20,000 agents with social media marketing by creation of a web app and virtual assistant
- ➢ Optimized API functions for virtual assistant project to decrease load times by 250%
- ➢ Incorporated cloud technologies into availability monitoring web app and formulated plans to decrease response time by 50%
- ➢ Created visualizations of availability data and refined data queries using SQL within Grafana
- ➢ Administered and supported deployments of availability webapp across multiple environments using Kubernetes and Docker

Enterprise Technology Intern | State Farm | Bloomington, IL — Full Stack
May 2017 — Aug 2019 — Docker, HTML/CSS, Java, JavaScript, Spring, SQL

- ➢ Developed a website to track recreational activities and events, discounts, and other local benefits for internal employees
- ➢ Aided in the migration of a tool written in Visual Basic to move it to a webapp that uses Spring Boot
- ➢ Tracked Agile practices for teams throughout State Farm by developing a web application with Ember.js

PROJECTS

Personal website — HTML, CSS, JavaScript
- ➢ Designed and developed a personal website to showcase and document my career and interests

Stock Price Predictor | INFO 490: Machines, Data, and Python — Python
- ➢ Analyzed historical trends for user specified stocks to predict the change in another stock using Pandas and NumPy along with the Yahoo Finance API

Canon Movie Maker | CS 126: Software Design Studio — C++, Cinder
- ➢ Programmed a tool to help create time lapses and stop motion films with a Canon DSLR. Used C++ and Canon SDK, to interface with the camera which also allowed the user to utilize any display as a digital viewfinder.

Life with Geoff | CS 125 Intro to Computer Science — Java, XML
- ➢ Created an AR Android app that uses facial recognition to superimpose a picture onto other's faces

TECHNICAL SKILLS

- • AR
- • C/C++
- • Cloud
- • Containerization
- • Data Science
- • Docker
- • Flask
- • HTML/CSS
- • Java
- • JavaScript
- • Kubernetes
- • Machine Learning
- • MongoDB
- • Node.js
- • Project Management
- • Python
- • R
- • React.js
- • SQL
- • Web Development

Work Authorization: U.S. Citizen
